PLACEHOLDER CV: replace this file with the current CV before publishing.

Profile

Senior engineer working across application code and infrastructure: web applications end to end, CI/CD, cloud and self-hosted platforms, and AI tooling adopted with care.

Skills

Application: TypeScript, Node.js, React, Go, Python, REST and GraphQL APIs

Data: PostgreSQL, Redis, queues and event streams, schema migrations

Infrastructure: Linux, Docker, Kubernetes, Terraform, AWS, Azure, on-prem

Delivery: CI/CD, GitHub Actions, GitLab CI, observability, incident response

AI tooling: coding agents, self-hosted model serving, LLM APIs, cost tracking

Experience (outline - dated history to be added)

Contract - Platform and DevOps engagements

Contract - Full-stack product delivery

Contract - AI tooling adoption

Earlier - Permanent developer and senior developer roles
