Lance Keay

Senior full-stack developer and DevOps engineer - lancekeay.com - hello@lancekeay.com

Draft CV: the experience section is an outline to be completed with dated roles.

PROFILE

Senior full-stack developer and DevOps engineer. I build web applications and the pipelines and infrastructure that ship and run them. I write things down, leave systems easier to run than I found them, and hand over work cleanly.

SKILLS

Languages: TypeScript, JavaScript, Python, Go, Bash, SQL

Front end: React, Next.js, accessible HTML and CSS, design systems

Back end: Node.js, REST and GraphQL APIs, PostgreSQL, Redis, queues and workers

Delivery: GitHub Actions, GitLab CI, trunk-based workflows, release automation

Infrastructure: Docker, Kubernetes, Terraform, Ansible, AWS, Linux, Proxmox

Observability: Prometheus, Grafana, structured logging, actionable alerting

AI tooling: model APIs, retrieval pipelines, local inference with Ollama, cost tracking

EXPERIENCE SUMMARY (OUTLINE)

Senior full-stack and DevOps contractor (current)
Feature delivery on TypeScript and Python services, CI/CD rebuilds, and moving workloads onto containers with infrastructure as code.

Senior engineer, product team
Owned services end to end, from schema design to on-call. Led the move from hand-built servers to automated deployments.

Developer to platform engineer
Started on web applications, then moved towards the build, release and monitoring work that kept them running.

WRITING

Hands-on reviews of AI tools, agents and self-hosted software, and a monthly AI token market post, at lancekeay.com.
