Lance Keay

Senior full-stack developer and DevOps engineer

Sample CV: this file stands in until Lance supplies his own. It repeats the About page.

Profile

I work across the whole stack: the interface people use, the API behind it, the database under that, and the pipelines and servers that ship and run it.

Skills (sample list)

Application: TypeScript, Node.js, React, Python

Infrastructure and operations: Docker, Kubernetes, GitHub Actions, Ansible

Data, monitoring and AI: PostgreSQL, Prometheus, Grafana, Ollama

Experience in brief (sample entries)

Contract full-stack developer: web applications from database to interface.

DevOps engineer: CI/CD pipelines, container platforms, monitoring and runbooks.

Writer, lancekeay.com: reviews of AI tools and self-hosted software; the monthly AI token market post.
